

Notes from Stakeholder and Agency Meeting regarding re-opening of AllenCo Energy, June 5, 2019

Reminder of outstanding items from the May meeting:

- DPH to organize an air quality meeting with AQMD, stakeholders, CARB, and other interested parties -- Pending
- AQMD to send link to 1148.2 website -- Pending
- LA City Petroleum Administrator to send Murphy and Johnson Facility IDs to AQMD for chemical records search and to work on educational presentation on workings of oil operations for non-technical members of the group – Pending
- LA City Attorney to secure participation of LA Fire Department – Complete

Meeting began with reflections on the neighborhood walking tour that took place last month.

Updates:

DOGGR: Continue to revise response letter to AllenCo on latest Start Up Plan draft; reports that AllenCo will be moving bleed down equipment on site next week.

AQMD: No odor reports have been received since last meeting; Will verify permit conditions and if anything else is needed for the bleed down. Inspectors can be on site for odor surveillance during the bleed down, so long as AQMD is notified of when the bleed down will occur.

USEPA: Letter in response to AllenCo submitted documents is still in drafting process.

LAFD: Fire alarm at AllenCo Energy has been approved but the fire pump has not. That requires a re-inspection at the request of the operator. Inspectors may go out to do a walk thru.

LAFD (CUPA): Permit is active and regular inspection is due in August 2019. There is a reported chemical inventory of 7 chemicals, all of which are typical for oil production well sites.

LA City Petroleum Admin: Concerns about the microturbines, which have not been approved by City Planning, and about AllenCo Energy potentially trucking oil off site.

Esperanza: Questions about the age and integrity of the pipelines in the area. Request that DOGGR provide a report. DOGGR advised that they can provide a report now and that the report would be updated in October when new information must be submitted by AllenCo.

Follow-up items:

- DOGGR to provide report on pipeline age and status.
- DOGGR to notify the Agency and Stakeholder group when bleed down is scheduled to begin
- Esperanza requests street map overlay of spider well map
- Everyone- complete poll to set meeting date for July (regular meeting on July 3rd is cancelled).

Next meeting was scheduled for July 3, 2019. Given the holiday, a new meeting date will be set for the 2nd week of July. Please complete the poll ASAP.
